

PLASTIC EARTH PIT / HOUSING

Material : Plastic

This 'HEX' Earth housing pit is manufactured from heavy high-grade polypropylene for high strength & stress levels to absorb a maximum load of 5000 kg. Stabilised against degradation by non-brittle and by sunlight to prevent cold weather damage. The light weight feature allows easy handling, storage and transportation, thus increasing installation efficiency. Termination area is increased by 100% due to simple locking of two units together, allowing deeper earth electrode connections to be made and reducing the effects from harmful voltage gradients.

Product Code : HEP

EARTH ROD SEALS

Material : Plastic

The earth rod seal is fitted when the earth rod connection is below the water level and where there is a possibility of water entering the inspection housing from below ground. HEX earth seals are specifically designed to suit earth Rods of various diameters from 1/2" to 3/4 ". These seals are used along with HEX earth Pits.

Product Code : HES - 1234

P.S. : Please specify Earth Rod diameter to be used with.

EARTH BARS FOR EARTH PITS

INSPECTION HOUSING EARTH BARS

These earth bars fit into the slots provided in the earth pits housings and are used when multiple connections to the grounding rod are required.

Material : Copper

No. Holes	Holes Ø mm	L mm	W mm	H mm	Product Code
5	12	290	30	6	HEBC 05
7					HEBC 07

P. S.: Other hole sizes / extra holes available on request.
